

# TAMS II Server Registration for GPC-Owned Stores

Note: TAMS II servers for company-owned stores have already been enrolled in VeriFone's PAYware Connect service. Follow the instructions below to complete the registration to enable tokenized transactions.

## Establishing a Connection between the TAMS II Server and VeriFone

1. Select **System Mgmt > Invoicing > Invoicing Controls** from the menu.
2. On the **General** tab, verify that the **Allow Tokenized Transactions** box and the associated **Lock** box are checked. If not, click to check each of them.
3. Verify that the **Tokenization Client ID** has been pre-filled.
4. Click the **Fetch Tokenization Device Key** button.
5. Click the  **Save** icon. These setting changes will take effect the next time you log in to TAMS II.
